Transform guest
entertainment from
a cost center to a
value driver

Guest entertainment has transformed over the years

In the last few decades, the perception of in-room TV has shifted from an exciting amenity to a table-stakes offering.

Today, although TV isn't typically a draw for guests in its own right, hoteliers can't afford to go without it. **Guests have grown so accustomed to TVs in hotel rooms that most hoteliers won't book rooms if the TV is out of commission**—booking an "incomplete" room can tarnish the guest's brand perception. This, in turn, impacts revenue.

Still, guest entertainment doesn't have to be a sunk cost. With the help of new and emerging technology, **it can once again become a compelling amenity for guests and a unique value-driver for hotels.**

A look at the landscape

New technologies play an important role in travelers' decision-making.

73%

73% of travelers agree that they're more likely to stay at a hotel that offers self-service technology.¹

Many hotels are already taking note of this—and rising to the occasion.

86%

of hotel operators rank guest loyalty as a leading priority for technology.²

81%

of hoteliers believe technology will play an increasingly critical role in hotel success over the next five years.³

54%

of hotel operators say that connecting new solutions to outdated systems is a top technology challenge.²

Still, there is a fear of the unknown when it comes to in-room technology, in particular. Things like the **cost of equipment, additional labor, and rooms being out-of-commission during installation are perceived barriers to entry** that prevent hoteliers from upgrading.

However, maintaining the status quo isn't going to be enough in the years ahead. To stay competitive, hotels need to become more tech-enabled. And there's an excellent opportunity in high-value digital and entertainment experiences that **enrich guests' stays, boost profitability, and deepen brand loyalty.**

Let's explore the areas of value you may not have considered.

The value of exceeding expectations

The customer experience has become increasingly important, as guests today want more from their stay. Elevating in-room technology is a great way to deliver—and prepare for even higher expectations in the future.

And what are these expectations, exactly? **Your hotel's technology should be reliable, easy-to-use, and create value for guests and employees alike.** At the same time, it shouldn't result in more complexity for your staff.

When implemented correctly, an in-room entertainment platform can deliver unexpected value across all your properties.

Improve guest satisfaction

Personalize the guest experience

Increase bookings for paid onsite services through in-room advertising

Support employee workflows and reduce turnover

Streamline hotel operations

The value of a modern entertainment experience

If your current in-room entertainment experience is driven by live TV, new technology can integrate with your existing in-room TVs to unlock lots of opportunity—with relative ease:

- Third-party streaming on in-room TVs gives guests options beyond live TV lineups.
- Casting capabilities make it easy for guests to watch content from their own devices on in-room TV screens.
- Universal search helps guests find content across multiple sources with one query.

70%

of guests consider access to streaming services on in-room TVs when choosing a hotel.⁴

Options like these don't just help to raise guest satisfaction—they **can also fuel loyalty and boost revenue**. One reason? Tech-enabled experiences are highly prized by Millennial and Gen Z demographics. Both generations are hyperconnected—they've been raised alongside emerging technology and have become accustomed to its conveniences. Plus, their buying power is enormous—and not likely to shrink anytime soon.

\$12T

By 2030, Gen Z's purchasing power is projected to surge to an estimated \$12 trillion.⁵

52%

52% of Gen Zers say they splurge on experiences, while only 29% of baby boomers do the same.⁶

So, it's no surprise that hoteliers are making moves to appeal to these audiences through technology.

45%

45% of hotel executives said an on-demand in-room entertainment set-up was what they were most likely to implement by 2025.²

Value of revenue from on-property amenities

Guests are spending more time and money outside their rooms while on-property. Amenities like the spa, bars and restaurants, dry cleaning, and concierge services are driving major revenue for hotels.

30 to 40%

of hotel revenue growth today is being driven by non-room offerings.⁷

39%

39% of guests prefer hotels to provide a completely contactless option for routine transactions.¹

Customizable in-room TVs that can spotlight paid amenities or important property information make it easier for guests to find and utilize paid onsite services and experiences. And when guests can use QR codes on the TV to easily book a massage, a dinner reservation, or a guided tour without contacting the front desk or browsing through brochures, that means more opportunities for your hotel to earn revenue from those services.

91%

91% of consumers are more inclined to buy from brands that tailor offers and recommendations to their interests.⁸

Value of employee experience and operational efficiency

Advanced in-room entertainment platforms don't just benefit your guests—they can also ease workflows for your employees. In a competitive labor market, it's hard to overstate the value of tools that support and empower workers.

34%

34% of guests said slow service resulting from a staff shortage would be their #1 deterrent to rebooking a hotel.¹

65%

65% of hoteliers said “incorporating new technologies for staff” best describes their strategy to weather labor shortages and attract new talent.⁹

Using guest TVs to allow guests to self-serve important property information such as check-out hours, restaurant hours, or local activities reduces time-consuming tasks for your front desk staff, who'd otherwise have to field those requests manually.

54%

54% of hoteliers said their highest priority was to adopt tech that improved or eliminated the need for the front desk experience by 2025.¹

If you're worried that these efficiencies will impact the guest experience, you'll be relieved to know that self-serve options are something travelers don't just enjoy, but prefer. **Guests crave contactless experiences that limit the need to contact staff**—something that benefits staff and guest health and wellbeing, while helping alleviate staff workloads and increase operational efficiency.

73%

73% of travelers agree that they're more likely to stay at a hotel that offers self-service technology.¹

It pays to transform guest entertainment

All of this considered—there's a clear financial incentive to invest in modern guest entertainment technology.

With DISH Business, hoteliers can elevate entertainment, streamline hotel operations, and stay ahead of evolving guest and employee expectations.

Our technology powers efficient self-serve experiences across your entire property and is designed to evolve with hotelier needs while providing the best value for your business. With DISH Business, your hospitality technology will never be behind the times, and your guests will always find something to delight in.

Learn more about how you can elevate your hotel experience while unlocking new revenue streams with DISH Business.
